Question 6

Mark 1.00 out of

P Flag question

Correct

Your total refund will be \$7.00.

7 | print(f"Your total refund will be \${c:.2f}.")

Your total refund will be \$7.00.

Your total refund will be \$6.60.

If the final result(hrs) are in -ve convert that to +ve using abs() function

The abs() function returns the absolute value of the given number.

Ramesh's basic salary is input through the keyboard. His dearness allowance is 40% of his basic salary, and his house rent allowance is 20% of his basic

Write a simple python program to find the square root of a given floating point number. The output should be displayed with 3 decimal places. Sample Input: 8.00 Sample Output: 2.828 For example: Input Result 14.00 3.742 Answer: (penalty regime: 0 %) 1 import math 2 a = input() 3 b = float(a) 5 c = math.sqrt(b) 6 print(round(c,3))

Input Expected Got 2.828 3.742 2.0 22.068 🗸 Marks for this submission: 1.00/1.00. Alfred buys an old scooter for Rs. X and spends Rs. Y on its repairs. If he sells the scooter for Rs. Z (Z>X+Y). Write a program to help Alfred to find his gain percent. Get all the above-mentioned values through the keyboard and find the gain percent. The first line contains the Rs X The second line contains Rs Y

10000 46.34 is the gain percent. 46.34 is the gain percent. ✓

30.43 is the gain percent. 30.43 is the gain percent. ✓ 40.00 is the gain percent. 40.00 is the gain percent. 🗸 2.86 is the gain percent. In many jurisdictions, a small deposit is added to drink containers to encourage people to recycle them. In one particular jurisdiction, drink containers holding one liter or less have a \$0.10 deposit and drink containers holding more than one liter have a \$0.25 deposit. Write a program that reads the number of containers of each size(less and more) from the user. Your program should continue by computing and displaying the refund that will be received for returning those containers. Format the output so that it includes a dollar sign and always displays exactly two decimal places.

Justin is a carpenter who works on an hourly basis. He works in a company where he is paid Rs 50 for an hour on weekdays and Rs 80 for an hour on weekends. He works 10 hrs more on weekdays than weekends. If the salary paid for him is given, write a program to find the number of hours he has
